Product Description

With the Advent Calendar RC Helicopter from Revell Control, the anticipation of Christmas begins anew every day. The calendar is more than just a collection of components - it is your gateway to exciting flying experiences and modelling skills. From the first of December, the Advent calendar reveals a new component every day, allowing you to create your own remote-controlled helicopter step by step. The detailed components and powerful electric motors guarantee that the helicopter will not only look good at the end of the Advent season, but will also fly impressively. This Advent calendar is ideal for children aged 8 and over and ensures not only fun during assembly, but also unforgettable flight manoeuvres. The helicopter impresses with its realistic replica and high-quality workmanship. Whether indoors or outdoors - the RC model offers an extraordinary flying experience and at the same time encourages patience and fine motor skills. The daily assembly of the helicopter makes the calendar a unique combination of anticipation, learning fun and adventure! Scope of delivery- Daily components for the RC helicopter- Two powerful electric motors- 3CH-GHz remote control for precise control- Detailed step-by-step assembly instructions- Surprise elements for extra fun Special features:- Highly detailed components: For a realistic and aesthetic replica of the helicopter.- Powerful electric motors: Ensure a realistic and aesthetic replica of the helicopter.- Highly detailed components: For a realistic and aesthetic replica of the helicopter.- Powerful electric motors: Ensure a realistic and aesthetic replica of the helicopter.
