Product Description

Sea rescue cruiser "Hermann Marwed" on a scale of 1:200 Discover the model kit of the sea rescue cruiser "Hermann Marwed", a masterful replica of the well-known specialised ship of the German Maritime Search and Rescue Service (DGzRS). This 1:200 scale kit is a tribute to the ship, which plays a central role in numerous rescue operations in the North Sea. With a total of 78 precisely manufactured parts, the kit offers an authentic building experience. The dimensions of the finished model are 230 mm in length, 110 mm in height and 53 mm in width, making it an impressive display piece. Recommended for modellers aged 10 and over, this kit requires an advanced skill level 4 and offers a challenging and rewarding experience for any modelling enthusiast.

Scope of delivery- Two-part hull with bow thrusters- All-round railing- Detailed deck superstructure- Authentic radar mast- Assembly instructions

The "Hermann Marwed" kit is ideal for advanced modellers (level 4). It requires experience in gluing and painting and is therefore an excellent choice for all those who want to further develop their modelling skills.

Special features- Precise attention to detail that faithfully reproduces the original ship- High-quality materials for long-lasting model quality- Promotes fine motor skills and spatial imagination- Perfect for collectors and maritime enthusiasts

Background information

The original ship "Hermann Marwed" is the largest rescue cruiser of the German Maritime Search and Rescue Service (DGzRS). Since its commissioning in 2003, its crews have carried out more than 600 missions in the German Bight - for seafarers, fishermen, ferry passengers and water sports on the world's busiest shipping lanes. More than 1,000 sea rescuers on 60 rescue units are deployed around 2,000 times a year - around the clock, in all weathers, financed exclusively by voluntary donations. Since its foundation in 1865, the DGzRS has rescued more than 86,000 people from distress or danger at sea. This model kit is not only a tribute to the ship itself, but also a tribute to the life-saving work of the sea rescuers on the North and Baltic Seas. By assembling this model, you can immerse yourself in the world of sea rescuers on the North Sea and Baltic Sea and experience them up close.

- Width: 5.3 cm- Length: 23 cm- Height: 11 cm- Age recommendation: 12- Scale: 1:200- Individual parts: 78
