Product Description

Enter the home of survival horror in this cooperative campaign board game for 1-4 players. Step into the boots of Jill Valentine, Chris Redfield, Rebecca Chambers, or Barry Burton to search for secrets and survivors in an open world crawling with enemies. Navigate 19 spine-tingling scenarios filled with horrifying surprises and fiendish puzzles, making choices that matter and could even change the course of your campaign. Or, play each scenario as a terrifying standalone experience. Every resource must be managed; every bullet counted. And all the while, the danger level is rising around you... Inspired by the 2002 remake of Capcom's genre-defining survival horror video game, this board game takes you back to where it all began.
