Product Description

RC robot 'Rob-E' - maximum playtime fun for little explorers
 The RC robot 'Rob-E' is the perfect toy for young technology fans who want to explore the world of robotics. With its easy-to-operate 2.4 GHz remote control and programmable movement sequences, "Rob-E" enables an interactive play experience. The robot can be steered forwards, backwards, left and right and delights with illuminated LED eyes and exciting sound effects. The integrated demo mode offers a variety of movement sequences that will amaze your child. Particularly practical: "Rob-E" is suitable for children aged 6 and over and is easy to understand, so even the youngest children can get started straight away without any previous knowledge. The intuitive controls make it easy to plan and programme the robot's movements - this not only promotes fun, but also your child's cognitive skills and creativity. "Rob-E" is not only entertaining, but also a durable and high-quality product that impresses with its robust workmanship. The battery-operated robot provides hours of fun, whether alone or with friends. The illuminated LED eyes and sound effects turn every movement into a highlight and invite you to exciting adventures.

 Background information
 The RC robot "Rob-E" not only offers innovative fun, but also gives children the opportunity to take their first steps in the world of programming and robotics in a playful way. Thanks to its simple operation and programmable movement sequences, children learn about basic logic and technical relationships in an entertaining way. "Rob-E" supports the development of cognitive skills and encourages creativity at the same time. The robot is also designed to stimulate the imagination and inspire children to go on their own adventures - whether alone or with friends.
