Product Description

RC X-TREME Quadrocopter "Marathon"- Width:32 cm- Length:32 cm- Height:7 cm- Item no. 24898For all pilots for whom pure flying fun is particularly important. The combination of four powerful motors and a long-lasting LiPo battery make this model an endurance flyer. 30 minutes of flight time under full load and agile flight behaviour are complemented by technical details such as an altitude sensor, switchable headless mode and a modern 6-axis stabilisation system. The 4CH-GHz remote control ensures precise control. The two-colour LED lighting not only looks good, but is also used for orientation in the air. With flip function. The replaceable LiPo battery is charged easily and conveniently using the USB charger supplied.- LED lighting- Headless mode and altitude sensor- Particularly powerful battery for 30 minutes of flying fun at full power- Replaceable battery with USB charging cable
