### Product Description

This pack contains accessories to enhance any Torg campaign. A map of Pan-Pacifica shows all the invasion zones in China, North and South Korea, Japan, Thailand, Cambodia, Vietnam, Laos, Taiwan and parts of Australia. One side of the threat cards contains the values players need to calculate their own attacks. The other side contains the special abilities and attacks that the game master needs without having to consult a book. The threat tokens are robust tokens that match the monsters and enemies encountered in the game. They are ideal for tactical battles or for keeping track of the number of enemies and their conditions, even without using a map.
