

Item no.: 400660

## 52001846 - Paletto small

from **31,89 EUR**

Item no.: 400660

shipping weight: 0.30 kg

Manufacturer: Gerhards Spiel und Design

### Product Description

Colourful puzzle fun by Dieter Stein There are pieces in 6 colours on the board, always well mixed and never the same colour next to each other. There are either marbles or wooden cylinders - the choice is yours. Paletto is a colourful puzzle game with few rules and is therefore quick to learn. Who has all the pieces of one colour at the end or takes the last piece from the board? That is the predetermined goal of the game. On each turn, pieces of the same colour can be removed from the board - but only if they are freely accessible from two sides and all other pieces are still connected at right angles. At the start of the game, these can only be the corner pieces, but after the first few turns, the possibilities become more varied. And tactics come into play at the latest when a fellow player has 5 of the 6 pieces of the same colour. The last third of the game therefore becomes really exciting: How can I persuade my opponent to take only a few marbles? - or get him to take exactly the tile of a certain colour. Paletto is simply fun - at any age. What does "pure nature" mean? Our games are handcrafted, unique pieces of outstanding quality. Every game board is different and unique. Wood is a natural product, every tree has its own story. In this "Pure Nature" section you will find games with a more lively and non-regular surface, games with traces of knots or colour nuances. A lot of fun for less money! Caution! Not suitable for children under the age of three. Small parts can be swallowed. for 2-3 players aged 8 and over Game board made of solid beech, oiled - 14.5 x 14.5 cm with 36 colourful marbles
