Product Description

Black holes Tilt - Turn - Disappear by Reiner Stockhausen A three-dimensional challenge - made entirely from solid wood The game is played on an elaborately designed game board made from solid oiled beech. Four indentations, the "black holes", are finished with dark felt. The aim is to be the first player to place four of their own pieces in the correct position in front of the "black holes" and sink them. A game that stands out due to its unusual move technique. You can only move your own pieces by tilting, turning and repositioning them. It is tactically important to leave as little room as possible for the other player to make moves. Block as many of your opponent's pieces as possible with just a few of your own - that's the theory. Try it out! **Caution!** Not suitable for children under the age of three. Small parts can be swallowed. for 2 players aged 8 and over Beech board, oiled 30 x 30 cm and 8 pieces each of light maple and dark walnut
