## 52040006 - Triad

from **45,48 EUR**

Item no.: 400685

shipping weight: 0.30 kg

Manufacturer: Gerhards Spiel und Design

### Product Description

Triad by Klaus Nehren  
With 3 you're in - this three is omnipresent in the game. The numerical values I, II and III can be found on each die. Each turn you have 3 actions: select a die, turn it to a different numerical value and move it the corresponding distance. The aim is to form triads. These consist of either a row of 3 dice with the same numerical value or 3 dice with different numerical values. At least 1 of the opponent's dice must be in a row. Once a triad has been completed, one of your own dice from this triad is removed from the board. The winner is the player who first removes their 3rd die from the board. Caution! Not suitable for children under 3 years of age. Small parts can be swallowed!  
Features:- For 2 players aged 8 and over- Game board made of solid beech, oiled, 20 x 20 cm- 6 special dice each in black and white
