Product Description

The Horned Rat Compendium is the fourth instalment in our five-part series of guides to the epic campaign The Enemy Within. It is packed with supplementary material to not only expand The Horned Rat, but also to support all WFRS adventures in which the devious skaven appear as enemies. The Horned Rat Compendium contains: - more background and information on the skaven, their history and society, and the terrible deity they worship - a huge selection of new equipment, spells, weapons and gadgets to equip your skaven NPCs with - new encounters in the city of Middenheim and the Midden Mountains, perfect to be incorporated into The Horned Rat or any other skaven-centred campaign - an SL guide to the Yellow Fang, an insidious cult that both worships the Skaven and seeks to outdo them - a new career, the Dwarven Ironbreaker, perfect for a burly Dwarf looking to take on the vile ratmen in the tunnels beneath the Old World - two classic adventures, revised and updated for the 4th edition. Edition of the WFRS Horrors in the Dark, featuring a terrifying encounter in a twisting mine, and Some Help from My Friends, an abduction case that goes far beyond the greatest and shortest detective in all of Middenheim - The Return of the Tomb Lord: Everyone's favourite ego-obsessed necromancer returns to torment the characters during the events of The Horned Rat. Is it paranoia when everyone is actually out to get you?
