### Product Description

All the wonders and dangers of the stars are at your fingertips - if only you can bring yourself to go out and face them. Airless moons orbit swirling gas giants longing to be transformed into the paradise of tomorrow. Dark, ancient secrets wait to be unearthed from beneath millennia of debris. Blossoming solar flares cook your flesh and blacken your bones, while harnessing their power to light up hundreds of planets. Long-lost secrets lie buried deep in the frozen hearts of icy comets. Tectonic layers shift and drown iridium mines in glowing lava. The truth about the origins of humanity also awaits you out there, perhaps in the orbit of a dying star? And in the midst of it all is something truly terrible - something nature never intended. Something alien. "Builders of Better Worlds" is a campaign module for the award-winning official ALIEN role-playing game. With this book you can set the scene for an extensive sandbox campaign in which the players act as explorers or colonists. This 292-page book includes:- History of Colonisation - the story of how humanity conquered the stars.- Explorers and Colonists - expanded character creation rules, including two new archetypes.- Equipment and Ships - an extensive chapter with new equipment, weapons and starships.- Systems and Colonies - 36 new planets to explore, including the colonies of the Outer Vortex.- Weyland-Yutani Catalogue of Extrasolar Species - a host of new terrifying xenomorphs for you to encounter.- The Lost Worlds - the setting and backstory for a massive sandbox campaign set in the far reaches of the Outer Vortex Colonies.- The Expeditions - seven exciting missions for your explorers, playable in any order.- Create Your Own Better Worlds - tools to explore planets and colonise them with new settlements.
