Product Description

On 252 full-colour pages, the country sourcebook Megalys offers a deep insight into the most technologically advanced country in Kreijor. The remote volcanic island of Megalys lies like a smoking chimney in the Icewind Sea. Tough, pale halflings rule the island in the name of their living god Al Hydron, a construct from the Atlantean era. This is the centre of operations for the Techguild, the Enforcers, the Commissariat and the other cults and orders of his holiness. Mechanoids, bizarre works of art made of steam and steel, awakened by magic and mechanical craftsmanship, walk among the mortals in gigantic, arcane machine cities. Using hydrozite crystals, the Megalysers have succeeded in giving some of their creations a consciousness of their own. Only the rigid divine order of the cogwheel, the world ideal of Al Hydron, prevents them from falling for the heretical temptations of the ancient adversary, the Master Builder. In the battle of progress against stagnation, chaos against order and flesh against machine, the puppet masters are in danger of losing control of their work. When Hydronites become creators of themselves, who needs mortals? The Arcane Codex GRW 3 is required to play.
