Stack of pyramid zoo animals

from **15,38 EUR**

Item no.: 388937
shipping weight: 0.50 kg
Manufacturer: Scratch

Product Description

This colourful, educational stacking tower with 10 cubes of different sizes can be stacked on top of each other to form a tower and placed next to each other as a puzzle. Try to put the hidden puzzle together by placing the blocks with the correct sides next to each other. The 5 sides are decorated with animals from all over the world and numbers to teach children to stack, puzzle, count and recognise. Nice extra: 5 blocks have a recess so that you can place 2 blocks on top of each other. For example, place "block 10" on top of "block 9" and combine the habitat with the correct animal. For example, you can combine the bamboo forest with the panda, the lion in the savannah, the toucan in the jungle and so on. This is a fun and playful way for the child to learn which animal belongs where.
