Product Description

The new X-TREME line from Revell Control stands for the ultimate driving experience in the RC sector. The X-TREME Cross Thunder offers all the performance you could wish for. The flexible, robust thermoformed body with its aggressive look conceals a plastic roll cage that perfectly protects the latest X-TREME chassis even in the event of rollovers. The Cross Thunder shoots over almost any surface at speeds of up to 50 km/h. The powerful electric motor drives the all-wheel drive and the extremely stable chassis has been equipped with impact protection, shock absorbers, 2 differentials, independent suspension and chunky rubber tyres to ensure that it also makes good progress off-road. The digitally proportional power steering enables precise steering. The Cross Thunder is equipped with a 3-channel 2.4 GHz remote control so that real races can also be driven. This technology allows different vehicles to be controlled completely independently of each other at the same time. The included 7.4 V Li-Ion battery enables a driving time of up to 20 minutes and is quickly recharged with the included USB charger. - RC truggy 1:18 with chunky tyres and all-wheel drive and proportional steering- Attractive thermoformed body with plastic roll cage- Independent suspension- Front and rear differential and shock absorbers- Extra stable chassis and impact protection- High speed up to 50 km/h with powerful electric motor- Li-Ion battery and USB charging cable- Width:18.5 cm- Length:25.5 cm- Height:12 cm- Item number: 24831- Recommended age: 14- Scale: 1:18
