### Product Description

Differix, children's game (DE), for 1-4 players, ages 4+

In the children's game "Differix" it's all about the ring and watch out! Is the clown looking to the right or to the left? Is his left or right pant leg blue? The apparently identical pictures only differ in detail. Only if you look closely can you see the differences. Each child has a card with the appropriate cards. Picture by picture is now checked to see where the correct place is on the placement board. Whoever manages this without a mistake wins the tricky game of concentration.

The placement boards differ in terms of motif and level of difficulty. The easiest is the blackboard with the elephant, followed by the piggy, clown and frog. In this way, the children train their basic skills such as concentration, precise perception and considered action on their own or in competition with others. Important prerequisites on the way to school readiness. Educational games that are really fun:

This is the motto of the educational game series by Ravensburger, with which children are supported in their development in the most intensive learning years. All games are developed and tested according to the latest scientific and educational standards. The learning materials are packed in exciting stories, a variety of materials and methods allow learning with all senses.

The Ravensburger brand has stood for quality games and fun since 1884. The German company was founded as a publishing house in Ravensburg and has been delighting young and old with a wide range of products from games and puzzles to books and handicraft materials ever since. In addition to having fun, learning is a top priority at Ravensburger: The principle of the founder Otto Maier was "learning by doing" back then and is continued to this day. Ravensburger products playfully support the development of skills for all ages. Well thought-out games, executed with high-quality workmanship: This is what the blue triangle from Ravensburger stands for.
