## 70253 - Cargo Truck

from **74,40 EUR**

Item no.: 401939  
 shipping weight: 0.10 kg  
 Manufacturer: UGEARS

### Product Description

Discover the Cargo Truck from UGears - an impressive 3D wooden construction kit that brings the fascination of long-distance transport to life. Immerse yourself in the world of mechanical art and experience hours of crafting fun! Order now and express your creative skills! Product description If you order the Ugears Cargo Truck now, you can soon call the biggest, most powerful 3D wooden model lorry your own. This spring-powered DIY advanced truck is a best-in-class model with a variety of moving parts and exciting realistic details. Three fully sprung axles and two differentials - one for the front axle, the other for the rear axles - allow your cargo truck to conquer any terrain and take on any challenge. Similar to the Mack NO 7.5 tonne 6x6 Cargo Truck and the Diamond T 4 tonne 6x6, which were used by the U.S. Army and the Allies during World War II, the Ugears Cargo Truck is a powerful all-weather off-road vehicle. The outstanding features of the Ugears Cargo Truck include its large dimensions, full suspension on all axles, the twin differential that distributes the drive separately from the spring engine to both the front and rear axles, an engine bonnet that can be opened to reveal the engine, functioning handles on the side doors, which, when opened, reveal the wonderfully detailed cab interior, adjustable rear-view mirrors, a spare wheel stowed behind the cab, a drop-down tail lift on the loading area, impressively detailed laser engravings on the entire vehicle and a powerful spring-loaded engine with winding key and start/stop switch. Once wound up, your cargo truck can travel 2-3 metres and has three fixed positions on the front wheels: straight ahead, left and right. This allows you to determine the direction of travel yourself. The Cargo Truck model kit comprises 550 parts, has an "Advanced" difficulty level (for experienced modellers) and promises 10+ hours of exciting assembly. You will find everything you need to assemble this 3D model lorry in the box. You don't need any glue or special tools. Detailed and illustrated instructions in 11 languages (English, Ukrainian, German, Spanish, French, Italian, Portuguese, Polish, Japanese, Chinese and Korean) will help you with the assembly. Don't forget to lightly sand and lubricate all moving parts (a piece of sandpaper and wax are included) to ensure optimal function. The rubber bands around the tyres give the wheels extra grip. If necessary, they can be easily replaced. You can leave your Cargo Truck in its attractive natural wood condition or paint or stain it in the colours of your choice. To set the Cargo Truck in motion, move the start/stop toggle switch (opposite the windscreen) to the stop position. Then make 6-7 full turns with the winding spanner on the underside of the chassis and place the truck on a level surface. Finally, all you have to do is press the start button. Watch your truck drive off to complete its next task. Or turn it round and watch the fascinating function of the drivetrain. You and your family will enjoy many hours of imaginative play with this 3D wooden lorry model. The truck also makes an eye-catching decoration for any shelf. Discover the extraordinary truck models in the Ugears catalogue, the all-terrain vehicle with track drive, the Manned Mars Rover, the Heavy Boy articulated lorry, the Lumberjack pick-up, the fire engine and more! The Cargo Truck from Ugears is a great gift for anyone who loves heavy machinery, truck models, military history, or who would just love a cool looking awesome truck for their home or office shelf. This 6x6 heavy duty truck is a great project for experienced modellers and those looking for a new challenge. Big jobs call for big trucks, and your Ugears Cargo Truck is just waiting to get to work! Information Model size: 38 x 15 x 15 cm Packaging size: 37.3 x 17 x 5 cm Number of components: 550 Assembly time: 10 hrs.
