Order your own UGears Compact racing car today and be amazed by its unique design!

Product description Get young hearts and minds racing with the Compact racing car from Ugears, a DIY 'easy' level racing car model based on the high performance racing cars of international circuits. Even the youngest of racing car enthusiasts will enjoy assembling and playing with this simple wooden toy racing car. With the Compact Race Car from Ugears, your child can turn any tabletop into a race track by setting up toy bricks or other toys as obstacles or using a piece of string or thread to create a winding race track. His stuffed animals and dolls can act as spectators and cheer the mini racing car as it reaches the end of the track! The Compact Racing Car has a sleek aerodynamic style with front and rear wings, giving it the look of a real top-of-the-range racing car. The single-seater open cabin and the open design of the wheels already show that this is the fastest of the fast. When you bump the Ugears compact racing car on a flat surface, it rolls and moves forwards with ease. It also has grippy rubberised tyres for cornering. Thanks to its compact size, you can easily slip it into your jacket pocket for racing adventures at a friend's house or in the playground. One of the great things about Ugears models is that they can be assembled without glue or special tools. Everything you need to put it together is in the box. Simply press the laser-cut parts out of the plywood sheets and then plug them together. Made from high quality plywood, the Ugears models can be left in their attractive natural wood state or painted, stained or varnished in colour combinations of your choice (colours not included). The DIY Compact Race Car is a great model for beginners that will delight all young car fans who dream of taking the wheel of a high performance race car to speed down the track. These Ugears models are an introduction to the wider fascinating world of 3D puzzles, model kits, automata, robots, wooden puzzle boxes and STEM Lab kits from Ugears. As your children learn to assemble these wonderful and exciting toys, their mechanical skills and imaginative play will be encouraged. Give your child a compact racing car for their birthday or any other occasion and let their technical and artistic streak run wild!
