### Product Description

Enjoy this fun arts & crafts activity to add texture with coloured sand to beautiful illustrations representing the Mexican art. These funny animals are just waiting for one thing: finding their colors! Use the colored sands from the kit and bring the frog, the salamander, the crocodile and the chameleon to life. SablImage is a fun arts & crafts range that was specially designed so that you children can easily and freely create sand art, without making a mess. Each kit contains:- 4 highly qualitative, thick and pre-cut adhesive boards with a protective layer, perfect for children, even the younger ones, to easily peel off each section of the illustration.- Illustrations with printed outlines, so that children can easily spot the illustration and the different sections to peel off.- More than 15 pots of coloured sand so that children can have a wide range in choice of colour, and enough sand to finish all the boards provided in the kit.- A made in France activity. Just remove the pre-cut protective surface and sprinkle over the different colours of sand. With every added colour, each illustration will come to life and turn into a true masterpiece. A fun, perfect and guaranteed result for artists of all ages! An eco-designed product. The SablImage range is turning green thanks to a new concept of responsible packaging! We are committed to working towards a more planet-friendly economy. Every day we think about new solutions to improve our products and manufacturing processes. We are already proud of our French manufacturing and our selection of responsible raw materials (recycled and recyclable cardboards and plastics, compact products), but we can go even further! That is why we launched: the Concept'box! It is a new concept of packaging «0 waste» :- The box is converted into a frame to sublimate one of the creations made by the kid, the packaging is therefore an integral part of the activity and does not have to be recycled!- The packaging is glued to guarantee inviolability of the contents, while allowing to remove the plastic film!- Like all our boxes, this box uses 100% recycled cardboard with Imprim'vert certified printing!

Content of the box - More than 15 small pots of coloured sand - 4 pre-cut adhesive boards - 1 frame

Eco conception- Box, boards made at least of 89% recycled cardboard
