Product Description

Experience the magic of Hogwarts Castle with the model building kit from Ugears! This unique 3D wooden puzzle is perfect for all Harry Potter enthusiasts and offers hours of building fun. Order now and bring the wizarding world straight to your home. Immerse yourself in the world of wizardry with the Hogwarts Castle model from Ugears! This exquisitely crafted 3D puzzle is not only a challenge for hobbyists, but also an impressive gift for any Harry Potter fan. Build me! Welcome to the school for witches and wizards! Imagine you're a young witch or wizard and you've just arrived at Hogsmeade station on the Hogwarts™ Express. You are standing on the platform and can't wait to start your first year at Hogwarts™ School of Witchcraft and Wizardry. A bearded giant loudly commands the first-year students to line up, and as you look around and take it all in, one of your classmates points in a direction and shouts: "There it is - Hogwarts™!" In the distance, up on a hill, you recognise the impressive towers and battlements of Hogwarts™ Castle. That's what you've been dreaming of, and what scared you at the same time. You gulp when you see a dragon hanging from the main tower - is it someone's pet or an emissary from "He-whose-name-must-not-be-named"? It's sure to be an exciting year, to say the least! Step into the wizarding world and build the majestic Hogwarts™ Castle by Ugears, a faithful reproduction of the wizarding school we know from the Harry Potter™ films. With its myriad towers and battlements, this static model with moving elements (including staircase and dragon wings) will transport you to a place of intrigue and enchantment. The Hogwarts™ Castle, which has a special licence from Warner Brothers, is an instant classic in the Ugears collection of Harry Potter™ wooden kits, along with the Hogwarts™ Express, Platform 9 ¾™, Quidditch™ Pinball, the Riding Knight™, the Flying Ford Anglia™ and Hagrid's Flying Motorbike™ with sidecar. The front of the model shows the buildings, towers, battlements and parapets of Hogwarts™ School of Witchcraft and Wizardry in detail, including pinnacles, cloisters, windows and laser-engraved textures of stone, brickwork and roof tiles. The reverse shows a sectional view of the castle. This makes the design more compact and allows the model to be placed flat against the wall. This allows you to see hidden details inside the castle, such as the Great Hall, the tower staircase, rooms and courtyards. On the side of the main tower hangs a dragon with movable wings, reminiscent of the scene in the film "Harry Potter and the Goblet of Fire", in which Harry is pursued by a fire-breathing dragon. This model is intended for ages 14+. It has a difficulty level of "medium", comprises 340 parts and takes approximately 6 hours to build. The parts are laser-cut into high-quality plywood panels. To assemble, all you have to do is remove the parts from the boards and put them together. Follow the detailed instructions with illustrations, which are available in 11 languages (English, German, Ukrainian, French, Polish, Spanish, Portuguese, Japanese, Italian, Chinese and Korean). You don't need any glue or special tools to assemble Hogwarts™ Castle - everything you need is in the box. Both experienced modellers and beginners around the world are delighted with the impressive Ugears collection of 3D mechanical puzzles, model kits, automata, robots, wooden puzzle boxes and STEM Lab kits. The sensational Hogwarts™ Castle 3D puzzle will no doubt delight anyone who has read the Harry Potter books or watched the films. Modelling is a great way to spend hours immersed in the world of Harry Potter. And when you're done, you'll have an impressive piece of work for a desk or a shelf in your child's room. The Hogwarts™ Castle model is a great gift idea for parents who want to reward their children for reading one or more Harry Potter books. It's also a fun craft project for the whole family. Take your young wizard or witch on a magical adventure to Hogwarts when you assemble Hogwarts Castle™ from Ugears! Information- Model size: 36.9 x 27.3 x 11.7 cm- Packaging size: 37.3 x 17 x 5 cm- Number of components: 340- Assembly time: 6 hours Perfect for hobbyists and fans The Ugears Hogwarts Castle model kit is more than just an ordinary puzzle. It is a challenge that requires skill, patience and attention to detail. This 3D puzzle is ideal for adults who have a penchant for complex building projects and for teenagers who want to improve their modelling skills. The adult building blocks are designed to create a realistic and authentic replica of Hogwarts Castle. An exceptional gift Looking for a special gift for a Harry Potter fan? This Harry Potter wooden puzzle for teenagers and adults is the perfect choice. Not only is it a fascinating model, but also a beautiful decorative piece that will look great in any room. The UGEARS Harry Potter castle model is an ideal gift idea that will delight both fans of the book series and lovers of high-quality model kits.
