## Product Description

3,7V 430mAh LI-PO AKKU #503023 #503024 #503026- Replacement battery for your drone- For Mini Race Copter (503023) or Mini Mario-Copter (503024)- Rechargeable battery- Package contents: 1 piece More power for your quadcopter Whether your old battery is slowly giving up the ghost or you are looking for a second battery for double the flight time: we have the right item for you. This lithium polymer battery has 3.7 V. You should know the voltage and take it into account when choosing the right charger. The unit milliampere hours (mAh) indicates the amount of charge that can flow through the device within one hour. This is 430 mA for this rechargeable battery. When disposing of your old Li-polymer battery, look out for the yellow boxes in electrical or DIY stores. Never dispose of your used battery in normal household waste. The disposal centres of the local waste disposal companies also offer options for professional disposal. This battery is intended for the quadcopter Mini Race Copter (503023) or Mini Mario-Copter (503024).- Rechargeable battery- 14+
