shipping weight: 0.50 kg  
Manufacturer: Folded Space

### Product Description

Note: Insert designed for game with external box dimensions of 29.5 x 29.5 x 7.0 cm. Official full colour insert compatible with Bitoku®. The design provides both efficient storage and improved game play. Many of the trays can be utilised during the game, and they greatly aid set-up and clear-away times. The rules and boards act as a lid on top of the trays. The trays are arranged in up to two layers as shown. All the trays feature a full colour print, inside and out. There is space for all cards to be sleeved with quality sleeves. The inside tray colours of the player trays match each of the four player factions. Each player receives their own player tray and the long resource tray can be placed next to the board in easy reach of all players. The outside print of the resource tray has been designed to interact with the board edge. As most of the player pieces are added to the player board at the start of the game, you can stand the tray next to your player board to even further advertise your allegiance. All the trays have colour icons added to the tray bottom to make it easy to know what goes where when clearing the game away. When packing the box, first place the main game board on top of the trays, together with the three larger board insert pieces and the tengu attitude tile as shown. Next place the player boards on top. Lastly place the rule books and player aids on top of the boards. Note that in order to have no lid lift you will have room for just one language set of the rules and player aids, so the second language set would need to be stored elsewhere. The single language rule books fully fill the box without any lid lift and allows for vertical storage of the game. FS-BTKU is an officially licensed insert product made in partnership with Devir Games®. All trademarks and copyrights remain the property of their respective owners, which are in no way associated or affiliated with Folded Space EOOD. This product consists of a flat-pack of 4 Evacore sheets. The trays require assembly, which is quick and fun, using ordinary PVA glue. Detailed instructions are included in the package.
