### Product Description

What fits together? Which two pieces make a picture? With my first puzzles with two pieces from Ravensburger, toddlers from the age of two learn to recognise matching pieces and put them together to form motifs. Nine lovingly drawn illustrations in the style of cardboard picture books provide varied puzzle fun for the little ones and playfully train eye-hand coordination. The large, sturdy pieces are perfect for small children's hands. First puzzles for toddlers aged 2 and over: Extra large and thick cardboard pieces guarantee the longevity of the toy. The difficulty of the puzzle can be determined according to the ability of the little puzzle beginner by giving them only a few or many pieces at a time. In this way, little ones proudly discover how one piece fits into another. With the right puzzle for their individual stage of development, toddlers understand their environment in a playful and enjoyable way and grow with the challenges. The age-appropriate puzzles from Ravensburger show pictures from the children's world. By the way, if the little puzzlers like to explore everything with their mouths: The safety of all the materials used has been confirmed by an independent institute. For more than 100 years, we have been developing puzzles the way children love them: age-appropriate in terms of motif, number of pieces and size.
