Why? Why? Why? Dinosaur Quartet

from **6,48 EUR**

Item no.: 404929
shipping weight: 0.20 kg
Manufacturer: Ravensburger AG

Product Description

Which dinosaur had the most horns? Which carnivore couldn't fly, but could glide through the air with the help of feathers? Whether horned or spiked dinosaurs, long-necks or predatory dinosaurs - in this card game, enthusiastic dinosaur fans will learn lots of interesting facts about 32 of the impressive prehistoric creatures from a total of eight categories. Whoever can form the most quartets consisting of four cards from one category wins. With an additional game variant. From long-necked and bird-footed dinosaurs, spiny, armoured and thick-skinned dinosaurs to a category of prehistoric creatures that were contemporaries but not actually dinosaurs at all. This game presents 32 fascinating prehistoric animals from a total of eight categories. Each card features detailed illustrations and an accompanying text that provides dinosaur fans with exciting additional information about the dinosaurs and their contemporaries. Each player tries to form quartets consisting of four cards from one category. Whoever has collected the most at the end wins. There is also another variant that can be played with the card set: whoever has the card with the erupting volcano in their hand at the end loses. An entertaining game for 3 - 6 inquisitive dinosaur fans aged 4 and over, in a handy format and at a low price. Details- Item number: 22359 - EAN: 4005556223596 WarningsNo warnings required.
