### Product Description

HeXXen 1733: Things from the Swamp - Regionalia, Hardcover, 128 pages.

In this Regionalia volume, we lift the ghostly mists that waft over a sunken land. We venture into the hell of the undead and search for hidden treasures beneath silt and mire. Things from the Swamp is the regionalia to the Undead Marshes, that devastated stretch of land that remained of the Netherlands after the Great Flood.

In Things from the Marsh we take a look at the last towns in and on the edge of the marshes, shed light on the rough work of the legendary treasure hunters of the Berge- und Hebe-Union, present a variety of new typical monsters and give rules for expeditions into the marshes.

The volume is divided into three parts: The first part offers background knowledge for players and expansion options for hunters, including the new profession Berger and the master profession Tovenaar. In the second part, we shed light on the secrets of this blighted region for the game master and provide game values for monsters. The third part consists of an exciting and partly detective adventure in Liège, which can serve as a basis for further exploration of the marshes.
