shipping weight: 0.70 kg
Manufacturer: Ulisses Spiele

Product Description

Playing pranks at their home academy, making lifelong friends through alchemical experiments or playing tricks on unpopular magicians - who wouldn't want to explore the world from the point of view of a curious young mage? This hero pack contains six prefabricated heroes for the adventure volume The Secret of the Student Magicians, all of whom are still at the very beginning of their guild magic training at the Academy of High Magic at Punin. The hero documents contain: - the full game stats of the heroes, - special rules for raising mage-heroes-in-training, - an explanation of the spells the young mages are proficient in, - an individual backstory for each character, - useful background knowledge about the Punic Mage Academy, - a helpful glossary of Aventurian guild magic terms, - an overview map of Aventuria and - plenty of space for notes and awards that come with a life as an adventurer! The pack also includes a large-format map of the Punin Mage Academy, the so-called Pentagrammaton. Caution! Not suitable for children under 36 months.
