Product Description

The Unknown Beckons! This sourcebook contains secrets that players and gamemasters can use to introduce and thematically exploit the supernatural in their campaigns! Here you'll find two new character classes ideally suited for venturing into the unexplainable: unleash the unfathomable powers of your mind as a mentalist, or access supernatural secrets and mystical tools as a thaumaturge! Also included are eight Classified Files, secret files on various paranormal topics that contain player options, tools for game masters and more in-depth information. It deals with alien beings, equipment to track them and what powers can be gained from an encounter with them. Cults and esoteric beliefs are introduced, apocryphal magic and the mystery of how to become a living vessel for a mystical being. And here you will find temporal anomalies, archetypes for travelling along the surface of time, and a new mystery that frees mystics from the shackles of causality. Each case file also contains a short adventure that brings the characters into contact with the paranormal. All eight together take the heroes across Golarion to experience the inexplicable phenomenon of the Age of Lost Omens! Caution! Not suitable for children under 36 months.
