Manufacturer: Ulisses Spiele

Product Description

Imagine the impossible! A land bearing the scars of war between two immortal Archmages and their respective nations.... Laws of nature suspended... Cities created by wishful magic and fields cultivated by the undead... Wastelands where magic is unpredictable and distorted - if at all... Explore the history of the immortal Mage Kings! Use explosive and unusual technology! Harness the power of awe-inspiring legends in a region where the past haunts the present and the echoes of destruction still resound in the minds and souls of those who venture into the Intangible Lands! This regional volume presents the lands of Geb, Nex, Alkenstern and Jalmeray, along with surrounding regions such as the Manaöde in eastern Garund. New lineages and other elements await game masters and players alike! Caution! Not suitable for children under 36 months.
