Product Description

The first vampires remember their first nights, but don't talk about them. Others have heard stories, but they do not believe them. The sages speak of the Book of Nod, but no one has ever seen this legendary book of ancient secrets with their own eyes. This is their story. The history of vampires begins with the Chronicle of Cain and the earliest nights. The Chronicle of Shadows reveals Cain's hidden teachings. And the Chronicle of Secrets reveals the deepest mysteries of the damned and the horror of the approaching Gehenna. The book Nod is published as an artistic hardcover. The A5-sized book is lovingly designed and presents the history of the vampires as you would hold it in your hands within the game world.
