Product Description

Tharkold is indeed hell on earth. Long ago, the demons crushed the humans in their Cosm in a world-shattering war that left both civilisations in ruin. Now the demons, empowered by occult technology and desperate for new realities to plunder, have turned their greedy eyes on Central Earth. Tharkold invaded Russia, but President Alexander "the Wolf" Volkov was prepared for the invasion. After a devastating nuclear strike, an unholy stalemate spread across an empire ruled by madness, radiation and demonic abominations. But the death of High Lord Kranod shattered the status quo. Kranod's serfs, the Wolf and a scheming demon with mysterious ties to the Gaunt Man seek to usurp rule of the realm. You play the heroes in this grim, blood-soaked realm. You are freedom fighters, criminals, renegades, psionics, or perhaps even the rare demon who seeks to leave their evil origins behind and change this devastated landscape for the better. In this book you will find: - new perks, spells, psic powers and occult tech for players - new threats, enemies and the unforgiving environment itself as foes - a detailed description of Tharkold's various factions and the regions they control - adventure entries and events from the first year of the Possibility Wars. Caution! Not suitable for children under 36 months.
