from **34,58 EUR**

Item no.: 369171
shipping weight: 0.10 kg
Manufacturer: Ulisses Spiele

Product Description

This Deluxe Edition consists of the artbook *The Art and World of Wolves on the Westwind* and the imprinted code for the game *Forgotten Fables Wolves on the Westwind*, as well as a specially mixed soundtrack. It not only lets you experience an epic adventure alongside proud warriors from the harsh land of Thorwal, but also gives you a closer look at the creation of the visual novel's illustrations and provides a wealth of background information on the land and its people. Set in the world of *Das Schwarze Auge*, the most successful German-language role-playing game, you will experience a unique adventure that impresses not only with a captivating story but also with beautifully drawn graphics. On 132 pages, we present you with sketches and final images of the characters and locations of *Wolves on the Westwind* as well as background information on the locations and game values of numerous characters so that you can use them as NPCs or opponents in your role-playing games. The two protagonists of the game have also been fully fleshed out and can be continued as your own characters. Thanks to a wealth of background information, the book is not only a wonderful extension of the computer game, but also offers newcomers and connoisseurs of *The Dark Eye* plenty of opportunities to continue the story with their own adventures and delve deeper into the world of *Aventuria*.
