Product Description

Cloud ship - full steam ahead! As a crew, the players navigate the cloud ship and let the raindrops fall into the right flower beds. But a storm is brewing and hail is gathering on board, damaging the flowers. The cloud ship is steered with a steady hand so that only the raindrops fall into the right flowerbeds. With good coordination, the challenge of making the flowers bloom can be overcome together. How to play Cloud Ship: - Place the box bottom in the centre of the table, put the bed borders together and place the storm marker on the starting space of the weather track. - Place the box lid on the table so that you can see the engine room inside. Shuffle the hail tiles and place them face down on the appropriate spaces of the engine room. Also place a flower tile on each space. - Set out the cloud ship, dice, raindrops and hailstones. - You play several rounds. At the start of each round, roll all three dice once. - If you have rolled storm symbols, move the storm marker forward the corresponding number of steps on the weather track. - For each die that shows a colour, place a raindrop in the cloudship. If you have already uncovered hail in the engine room, place the corresponding number of hailstones in the cloud ship. - Lift the cloud ship with one finger in each loop and steer it together over the flower fields. - Let the raindrops fall into the previously rolled flower beds. If you succeed, you plant flowers: Replace each raindrop with a flower tile from the engine room. Then reveal the underlying hail tile in the engine room. - You win the game together if you have planted all 12 flower tiles on the flower beds before the storm marker reaches the end space of the weather track. Contents: - 1 cloud ship- 21 tiles- 6 balls- 3 dice- 2 bed borders- 1 storm marker- 1 game instruction Dimensions: - 20.3 x 20.3 x 5 cm Author: - The 7 BaisGraphics: - Jan BintaKiesSuccess factors: - Quick game start thanks to simple rules- Cool 3D cloud- Cooperative game
