from **12,94 EUR**

Item no.: 385033  
shipping weight: 0.30 kg  
Manufacturer: Ulisses Spiele

### Product Description

The master set is designed to provide you with further support for running the Hidden Gift campaign. The included material will help you as the master to link the individual adventures of the campaign more closely together and to condense the open storyline dramaturgically. The game aid makes it easier for you to plan the hero group's itinerary and to organise the events in the adventures more stringently. It contains expansions to some adventure parts of the campaign, presents the possibilities and intentions of the heroes' opposing factions in detail and adds further ideas and actions to the beginning and end of the adventure. An extended entry option goes into more detail about the choice of the goddess's mistress, how heroes can take part in the preparations of their favourite for the office of supreme consecrator and what actions the opposing side will carry out. A new itinerary is also offered, which is linked to the alignments of the Divine Gifts of the Rahja Church. It is also explained in more detail how and with what strength the heroes' opponents could take action against the adventurers in the individual scenarios. In addition to the game aid, master character references, travelling companion documents and an additional map for the adventure location "Oasis of Pleasure" are also included.
