US25979 - DSA5 - Archive of the equipment

from **60,55 EUR**

Item no.: 385064
shipping weight: 0.20 kg
Manufacturer: Ulisses Spiele

Product Description

No warrior can do without his weapons, no thief without his burglar's tools and no mage without his books. The Equipment Archive contains descriptions of dozens of useful items of equipment, weapons and armour for travelling heroes. From the various mage's robes to typical adventurer's equipment such as torches, crowbars and throwing hooks to exotic items such as the blue Gwen Petryl glowstone and the astrolabe, a number of items are described that make a hero's life easier. The archive describes weapons such as the fearsome Warunker Hammer, the Maraskan Night Wind or the mighty Ogerschelle. More specialised armour, such as the fireproof Iryan armour or the Tulamid mirror armour, is also presented in detail with its special features. In addition to the items of equipment, this volume also contains descriptions of weapon and armour equipment as well as different types of projectiles. All items are not only described, but also provided with all relevant game values and a coloured illustration to make it easier to imagine them at the gaming table.
