Product Description

The expansion rules for The Black Cat contain an extensive bestiary, optional rules for Awakened mounts and carriages, the secrets of Havena, tips for playing, storytelling rules for playing with children without rules and character sheets to go with the storytelling game. Three adventures are also included. In "The great tomcat courtship", the heroes act as helpers to a lovesick tomcat and help him to outdo his competitors. "Glockenklippen" is a real burglary, because the merchant's family often makes a melodic whistling sound and a parrot probably lives there. What a rewarding haul! Finally, the heroes in "The Musekuss" are hired as actors, producers and prop masters. During the preparations, they can sew costumes, steal props, free a grumpy dragon and prove themselves in the "roughhouse". At the premiere, fame or a veritable embarrassment beckons.
