Puzzle ball The Moon - Glow-in-the-Dark

from **16,86 EUR**

Item no.: 404375
shipping weight: 0.10 kg
Manufacturer: Ravensburger AG

Product Description

Is there a moon floating in the room? "The moon" as a 3D puzzle ball makes this possible! And the best thing is: the 72 curved plastic puzzle pieces that make up the small satellite of the earth even glow softly in the dark! A fascinating sight that will make your eyes light up. Piece by piece, a true-to-original moon surface is created, without any gluing. Whether placed on the cleverly designed stand or hung in the room, all space fans can marvel at the floating decorative object. With the puzzle ball "The Moon", puzzle enthusiasts and full moon fans can recreate a miniature version of the moon in 3D and scrutinise it closely. The puzzle pieces, numbered on the back, enable a relaxing building experience according to motif or number and result in a stable moon ball - without any glue. The image material, based on real images from the Lunar Reconnaissance Orbiter, makes the puzzle ball a super-realistic, detailed replica of the original. The phosphorescent plastic pieces charge up in brightly lit rooms and then make the mini moon glow softly in the dark. Placed on the smartly designed stand or hung in the room using the nylon cord supplied, the decorative puzzle ball becomes a floating decorative highlight in any room. Details- Item number: 11586 - EAN: 4005556115860 Warnings Caution. Small parts. Choking hazard.
