Manufacturer: SentoSphère

Product Description

Use this creative and cosmetic laboratory to create colourful and delicately fragranced soaps with beautiful inclusions! The syndet bar soaps may be contemporary, romantic or magical with shimmering sparkles. The glycerine base melts within seconds in a microwave or in a bain-marie. When liquified, a child can measure various perfumes and colours before pouring it into the moulds provided and adding inclusions. The soap cools down within minutes and takes the shapes of flowers, frogs or geometric shapes and can be easily removed from the mould.- Empfohlenes Mindestalter: 8 Jahre Safe ingredients and formulas This DIY kit has been tested according to the Toy and Cosmetic regulations under dermatological control. All the ingredients and formulas it presents are non-toxic and are completely safe for children's skin.
