Product Description

Dice cup with D4, D6, D8, D10, D12, D20, D100 (150).

Dice cup with D4, D6, D8, D10, D12, D20, D100 (150). This jar is filled with 150 dice of different designs and colours, of each type. This is a perfect product for all collectors and dealers!

This is our largest set of dice and the true flood of polyhedra. It is like a real treasure, with beautifully crafted items, dice jewels and carved tokens. How big is your dice box? We will fill it to the brim. This casket is filled with over 150 standard polyhedron dice in various designs and colours, of every type. This product can consist of any dice from any uncensored set that Q WORKSHOP has or had or never had on offer. You can find real gems such as vintage dice from old times, dice in unique colours that are never released in sets, etc. This is a great opportunity for collectors. In some jars we randomly add a metal die. This is a bonus.

All of these dice are masterfully crafted and intricately engraved, made of the best material that is waterproof and sophisticated and will last a long time. Suitable for all tabletop role-playing games, board games and card games, these dice are a solution to the dice shortage. Waiting for your turn to roll the dice creates boredom in the action and spoils the fun. There are enough dice for all purposes, including as tokens or life counters. This is a perfect product for all players, even collectors and traders!

There are never enough dice. With this container, you and all the other players can feel like you're in the land of milk and honey, where all the rangers, warriors, mages and thieves have their own dice. You will never again have to borrow dice from someone, never again will someone take away your lucky set or a set that makes a statement: "These are dwarf dice, beware of evil elves!" or "My set is the most beautiful in the world, like my bard". It is up to you and your team what you want to do with so many dice in so many colours and types. You should always roll this big because you choose our bigger set.

This tin can also serve as a storage container for the dice, so that after the game the table can be easily cleaned up, which is important at events or in schools or role-playing fan clubs.

Caution! Not suitable for children under 36 months.

- Weight (kg): 0.65200
- Material: plastic
