Paletto large

from **41,49 EUR**

Item no.: 400659

shipping weight: 1.00 kg

Manufacturer: Gerhards Spiel und Design

Product Description

Colourful puzzle funThe board contains pieces in 6 colours, always well mixed and never the same colour next to each other. There are either marbles or wooden cylinders - the choice is yours. Paletto is a colourful brain teaser with few rules and is therefore quick to learn. Who has all the pieces of one colour at the end or takes the last piece off the board? That is the predetermined goal of the game. Pieces of the same colour can be removed from the board on each turn - but only if they are freely accessible from two sides and all other pieces are still connected at right angles. At the start of the game, these can only be the corner pieces, but after the first few turns, the possibilities become more varied. And tactics come into play at the latest when a fellow player has 5 of the 6 pieces of the same colour. The last third of the game therefore becomes really exciting: How can I persuade my opponent to take only a few marbles? - or get him to take exactly the tile of a certain colour. Paletto is simply fun - at any age. Caution! Not suitable for children under the age of three. Small parts can be swallowed. - Author: Dieter Stein- Players: 2-3 players - Age: from 8 years- Duration: 10 -20 minutes- Game board made of solid beech, oiled, 20 x 20 cm- With 36 colourful wooden cylinders
