Product Description

Welcome to the extraordinary, futuristic urban landscape that is The Last City 3D Puzzle. This parallel world is set in the universe of industrial steampunk and neon lights. High-rise buildings are built on a backdrop of pipelines, factories, and sharp bends, bearing witness to the frantic chase embarked by multiple speeding marbles.*Notes:Other marble runs and lift modules must be purchased separately. And you need to prepare 1 type-c power cable by yourself.This is a miniature house 3D puzzle marble run model toy full of cyberpunk style, with a total length of about 174cm of track inside. When marbles are thrown into the hole, it will shuttle through the city and rolling marbles from top to bottom by gravity, then climb up the lift to the top and repeat the entire process- Assembly size: 180*77*231mm- Package size: Top: 285*240*108mm Bottom: 278*233*108mm- Piece: 140
