Hagrid's flying motorbike

from **11,88 EUR**

Item no.: 392503
shipping weight: 0.40 kg
Manufacturer: UGEARS

Product Description

The miniature model Hagrid's Flying Motorbike™ with sidecar from the Harry Potter™ collection by Ugears is a miniature replica of the flying motorbike that Sirius Black, Harry Potter's godfather, lends to Rubeus Hagrid so that he can take the recently orphaned baby Harry to the Dursleys. Sixteen years later, Hagrid picks Harry up from there again, just before Harry's protective spell ends. This time, however, the teenage wizard rides in a sidecar. Sirius Black loved motorbikes, just like us! The Flying Motorbike from the Harry Potter™ universe has a movable steering wheel, wheels that turn and have round-toothed rims that make a wonderful rattling noise when you push the motorbike over a surface, and last but not least, a detachable open sidecar to take a friend on the adventure ride! For a touch of realism, the rear number plate reads "GDO 558", just like in the film "Harry Potter and the Deathly Hallows: Part 1", in which Hagrid and Harry battle a squadron of Death Eaters and you-know-who. The DIY motorbike model is made of appealing high-quality plywood and is powered by imagination. Set it in motion by simply rolling it over a smooth, flat surface, or lift it into the air and imagine you're on a mission to rescue a young wizard. This is an "Easy" model that can be assembled in less than an hour, even by novice modellers, with only 130 parts. As with all Ugears models, no glue or special tools are required for assembly - you simply have to put the parts together. Follow the illustrated instructions included in the kit (in English, German, Ukrainian, French, Polish, Spanish, Portuguese, Japanese, Italian, Chinese and Korean). The Hagrid Flying Motorbike™ mini model with sidecar is the first mini model in the Harry Potter™ collection from Ugears. It's a great little gift for any Harry Potter fan you know. What kid (or kid growing up) wouldn't love to assemble and show off this beautiful DIY motorbike? The magical motorbike is more than a simple static model, it's a wonderful toy waiting for imaginative adventures! - Model size: 13.5 x 8.5 x 11 cm - Packaging size: 20.3 x 9.2 x 1.8 cm - Number of components: 130 - Grade: Easy
