Serenity's dream (New Model)

from **48,05 EUR**

Item no.: 392507
shipping weight: 0.60 kg
Manufacturer: UGEARS

Product Description

Sailors know that feeling of peace when you are sailing on the sea under a cloudless sky and a steady breeze fills the white sails on an upwind course as you glide over the waves with skilful turning manoeuvres. You feel at one with nature and the elements as you skilfully luff and feel the boat gaining speed with the right trim of the sails. Invite a few friends over for a cruise, perhaps enjoy the evening with a bottle of wine and cheese - a dream you can live with the ingenious new mechanical yacht Serenity's Dream from Ugears. Together with the yacht Ocean Beauty and the trimaran Merihobus, Serenity's Dream forms the fleet of DIY sailboat models from Ugears. But unlike the two static models, Serenity's Dream yacht is a spring-powered wind-up boat capable of performing a series of turning manoeuvres on a flat surface over a distance of up to 4 metres. To do this, you must first set the start/stop switch on the cabin roof to the stop position. You will find the winding key on the foredeck. Insert it into the winding mechanism on the starboard side of the hull and turn it several times. Place the key back on the deck, place the boat on a level surface and set the start/stop switch to "Start". You can then watch as your yacht sails away and performs a series of turning manoeuvres with elegant zigzag movements. The realistic details of this DIY wooden sailing boat model will inspire you. These include the two set paper sails - mainsail and jib headsail - with furling system, so you can hoist and set your sails by simply turning them. Take a look at the elegant cabin, the railing supports running around the deck with ship's rope and the two steering wheels that allow you to steer from the optimum position at all times. There is also an anchor that can be hoisted, laser-engraved planks on the foredeck and the inward-sloping transom with the engraved Ugears logo. The Serenity's Dream 3D wooden puzzle has 365 pieces and a "medium" level of difficulty. This makes it an excellent model for modellers with some experience. As with the other mechanical wonders from Ugears, you don't need any glue or special tools to assemble this beauty. Simply press the laser-cut parts out of the high-quality plywood panels and slot them together. The illustrated instructions in 11 languages (English, German, Ukrainian, French, Polish, Spanish, Portuguese, Italian, Chinese, Japanese and Korean) will help you with the assembly. Each kit includes a piece of sandpaper and wax to smooth and lubricate the moving parts. The Serenity's Dream sailing ship is a great gift for anyone with a passion for sailing, modelling or clever mechanics. Calm your inner waves while assembling this model ship and enjoy that feeling of peace as you imagine sailing towards the sunset on a beautiful day with your scale model yacht. - Model size: 41 x 44 x 13.5 cm - Packaging size: 37.3 x 17 x 5 cm - Number of parts: 365 - Grade: Medium
