Fighter Pilot 2.5D Puzzle

from **21,69 EUR**

Item no.: 392514
shipping weight: 0.30 kg
Manufacturer: UGEARS

Product Description

Ugears presents the Fighter Plane from our Classic Vehicles collection - the first in the new series of 2.5D puzzles from Ugears! This cool wooden 2.5D aeroplane model to build yourself has movable elements and its own frame. It can be hung on the wall or placed on a desk or shelf. The fighter plane represents a classic 1940s Spitfire, the famous fighter aircraft used by the RAF and other Allies in the Second World War. The picture model shows 3 perspectives (front view, top view and side view) and has various moving parts, e.g. ailerons, propellers, wheels and cockpit canopy, which will bring your puzzle to life! The 2.5D Fighter Plane picture puzzle is a fun DIY project and an attractive decoration for your home or office. The 2.5D puzzles from Ugears are made of high-quality plywood, have the unmistakable Ugears design and can be assembled without glue or special tools. To assemble the model, simply press the laser-cut pieces out of the panels and then put them together. Viewers can look at the aircraft from three angles and be impressed by the moving parts of this vintage model from the Second World War era. Like the other classic vehicles in our new range of 2.5D puzzles, the fighter plane is unlike anything Ugears has produced before. These wooden mechanical images are, in a sense, flat 3D models that serve as static decoration, but with that little something extra: moving parts that bring the image to life. You can leave your 2.5D picture puzzle in its natural wooden state or paint, varnish or stain it in colour combinations of your choice (colours not included). Show off your artistic and constructive skills with Ugears! Lovers of classic jigsaw puzzles or laying pictures usually have to buy the frame separately if they want to immortalise and hang up their work. The 2.5D puzzles from Ugears do not need to be glued to a base and you do not need an extra frame for them. Your fighter plane has its own frame, with feet to stand on and a picture hanger - so simply assemble and then hang or place your plane where you like it best! The Ugears 2.5D fighter plane puzzle is a wooden model kit that promises 20-30 minutes of enjoyable assembly with 47 pieces and an "Easy" difficulty level. You will find everything you need to assemble it in the box, as well as the colourful and illustrated step-by-step instructions in 11 languages (Ukrainian, English, German, Spanish, French, Italian, Portuguese, Polish, Japanese, Chinese and Korean). You don't need any modelling experience to assemble this high-quality aircraft model. And if you get stuck or need help solving a problem, simply contact our customer service team who will be happy to help you. The 2.5D fighter plane puzzle will delight anyone who loves modelling and puzzles or has an interest in aviation. Are there children or adults in your family or circle of friends who are interested in aeroplanes? Surprise them with a 2.5D fighter plane, an original gift for Christmas, a birthday or just because. The Ugears 2.5D fighter plane puzzle is a fun and easy challenge, an entertaining creative project for the whole family and an attractive addition to your home decor. Start your collection of Ugears 2.5D wooden picture puzzles today with the Fighter Plane and then begin to explore the wonderful world of Ugears 3D mechanical puzzles, with cars, lorries, ships, motorbikes, automatons, robots, wooden puzzle boxes and STEM Lab kits.
