Hot Rod Furious Mouse

from **30,48 EUR**

Item no.: 392515
shipping weight: 0.30 kg
Manufacturer: UGEARS

Product Description

What's the first thing that catches your attention when you see a hot rod on the road? The customised paint job, the shiny chrome parts, the souped-up engine or the modifications to the bodywork that turn a boring factory model into a wonderful super model ready to shine on the catwalk of a motor show? Hot rods are individual automotive visions brought to life. They are pure passion (brmmm, brmmm!) - the visible expression of a deep-seated love of cars. For certain people, they are a treasure, their pride and joy - for the kind of people for whom the very thought of buying and driving a factory car is unimaginably dull and boring. At Ugears, we understand this. Our engineering and design team knows the nature of this almost crazy obsession with cars, those situations where your partner wonders why you'd rather spend a Saturday night tinkering in the garage or workshop until late. Well, dear crazy car fans, marvellous builders of marvellous machinery: here is our hot rod The Angry Mouse, the first model in the new dual-engine collection from Ugears. Start your dual engine collection today and get ready for more car models that will get your car enthusiast heart racing. The Hot Rod The Angry Mouse model has a dual engine function: you can wind up the spring motor with six turns of the ratchet spanner located under the chassis or simply pull your hot rod backwards on a flat surface, let go and watch it go, just like pull-back toy cars. Turn the front wheels of your hot rod to the left or right to make it corner elegantly. Or let it hurtle down the straight. Other features of the Hot Rod The Angry Mouse include the realistic proportions, the wonderful details of the engine and car interior and the twindoor doors with locking and door handle mechanism. The Hot Rod The Angry Mouse model kit has 207 parts and an "Easy" difficulty level. All you have to do is press the laser-cut parts out of the boards and then assemble them. Follow the detailed and illustrated instructions in 11 languages (English, Ukrainian, German, Spanish, French, Italian, Portuguese, Polish, Japanese, Chinese and Korean). Even newcomers to modelling will be able to assemble the toy car model in a maximum of 4 hours and then play with it for many hours of fun. A hot tip for your Hot Rod The Angry Mouse: "Perfect" the chassis (i.e., lightly sand and lubricate all moving parts and test run to make sure all gears move smoothly) before attaching the body module. As with all 3D puzzles, kits, automata, robots, wooden puzzle boxes and STEM Lab models from the excellent Ugears collection, you don't need any glue or special tools to assemble your hot rod. Everything you need is included. The Hot Rod The Angry Mouse is a great addition to our ever-expanding catalogue of Ugears racing cars, motorbikes, trucks and other attractive DIY vehicle models. He makes an excellent gift for all car and 3D puzzle enthusiasts. You can leave it in its attractive natural wood state or paint or varnish it in the colours of your choice. Green light for all super modellers: Paint, modify or spice up your Hot Rod The Angry Mouse to your heart's content! That's just the nature of things, isn't it? - Model size: 18.5 x 7.5 x 12 cm- Packaging size: 37.3 x 17 x 3.4 cm- Number of components: 207 - Grade: Easy
