Product Description

Jaguar 1 rocket fighter tank model set: Detailed miniature of a military masterpieceDiscover the impressive world of model making with the Jaguar 1 rocket fighter tank model set. This 1:35 scale model is an exact replica of the Jaguar 1, a key element of the German armed forces introduced in the 1970s. Known for its powerful HOT anti-aircraft missiles and exceptional cross-country mobility, the rocket fighter tank is perfect for collectors and modelling enthusiasts. Measuring 194 mm long, 71 mm high and 89 mm wide, this model offers an impressive presence. Included:- 197 precision-manufactured parts - Variants for the A1/A2 and A3 versions - Detailed aperture and Fla-MG - Basic paints, glue and brushes for an immediate start - Clear instructions for smooth assemblyThis model kit is ideal for advanced modellers (level 4). It requires experience in gluing and painting and offers a demanding yet rewarding challenge for young people and adults aged 12 and over. Special features:- Authentic reproduction with the finest surface details - Flexibility in model design thanks to optional parts - Includes all necessary materials for immediate start of construction - Detailed representation of the aperture and Fla-MGBackground information: The Jaguar 1 rocket fighter tank, introduced in the Bundeswehr in the 1970s, revolutionised mobile anti-tank defence. Its ability to effectively engage armoured targets at long range made it a feared and respected vehicle in the military arsenal. This model not only offers an authentic replica of the historic vehicle, but also provides an insight into its fascinating history and significance in military vehicle technology.- Width: 8.9 cm- Length: 19.4 cm- Height: 7.1 cm- Item number: 63353- Recommended age: 12- Scale: 1:35-Individual parts: 197
