1:10 RC Fast Attack Vehicle 2011 2WD LWA

from **168,67 EUR**

Item no.: 390615
shipping weight: 1.20 kg
Manufacturer: TAMIYA

Product Description

The Fast Attack Vehicle 2011 from TAMIYA is a buggy with a cool military look. The driver figure, MG and headlights give it a true-to-life appearance. The Fast Attack was first presented in 1984. Independent wheel suspension with spring struts and friction dampers ensure balanced driving behaviour. The chassis is made of robust ABS plastic and has a sturdy roll cage. The civilian buggy version The Wild One was later created on the basis of the Fast Attack Vehicle. The reissue was technically revised, with the battery box positioned lower and other details on the suspension improved. Changing the battery in the Fast Attack Vehicle is very easy, as the battery is inserted from below. Kit with detailed assembly instructions. Warnings: You should read and understand all instructions before starting assembly. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Caution! Not suitable for children under 14 years of age.
