1:10 RC Dark Impact 4WD Buggy DF-03

from **183,46 EUR**

Item no.: 390563
shipping weight: 2.00 kg
Manufacturer: TAMIYA

Product Description

High-performance 4WD buggy in a class of its own with ball bearings. Designed and built for tough competition use. Long swing arms ensure stable driving behaviour, easy handling and are supported by 4 oil-pressure shock absorbers. The centred motor and the position of the battery give the vehicle excellent balance when jumping off-road. The new tyres with the "Tread Pattern" profile are particularly suitable on hard, dusty tracks and are always "ONE METRE" faster. On- and off-road action - in sand, mud or even snow and ice... Warnings: Make sure you have read and understood all the instructions before you start assembling the model. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Caution! Not suitable for children under 14 years of age.
